Infrasys

A SHIJI GROUP BRAND

CLOUD RESTAURANT MANAGEMENT SOLUTION

ABOUT US

Who we are

Founded in 1998 as an infrastructure solutions company, the Shiji Group today comprises more than 70 subsidiaries and solutions serving the hotel, retail and catering industries providing everything from business consulting to pay-per-use software solutions. With more than 4000 employees and 100 offices in the world, we want to build a technological platform for the hospitality industry that facilitates hospitality innovation.

Fast. Reliable. Secure.

Infrasys is an enterprise-level cloud point-of-sale system. With an eye for innovation, Infrasys has all of the features that you need to run a successful operation, and provides a platform to implement new technologies as they emerge. For convenience, Infrasys is designed to work on any hardware device and operating system. It is one of the most versatile, secure, and efficient POS systems on the market today.

Infrasys
A SHIJI GROUP BRAND

TRUE NATIVE CLOUD

Utilize a true cloud-based platform that allows you to manage your restaurant operations anytime anywhere.

OFFLINE MODE

Solution enginereed for resilience and offline mode functionality, allowing you to continue critical point of sale operations even when communication to the cloud is unavailable.

MOBILITY

Take your restaurant mobile and increase speed of service. Mobility allows for mobile ordering, table-side ordering, and line busting.

ENTERPRISE ARCHITECTURE

Control and manage brand standards across multiple entities. View centralized revenue and sales statistics to increase profitability.

PUBLIC API

Increase business agility through Infrasys public API portal. Large range of API's available for customers or third-party app developers to develop connections into the platform.

HARDWARE OF YOUR CHOICE

Use your existing hardware or purpose built Shiji hardware. Supported operating systems include Android, iOS, and Windows.
